Client Server System (SE371)
Assignment 1

Instructor : Dr. Mohammad Malkawi   T.A.: karma Alzoubi

- You must build a client server application that have three client and one server, all client connect at port 3343.

- Each client must send a two value to the server which must entered by the client: The first value String (message) Second value: int (Which means number of client you want to send the message to it.

- This is apply for all the clients.

- This process will continue until one of the clients enter a message "end" or "stop".

- At the end, close all connection in the client and server.
